"ALKAMEDI"
assures you with better future life through healthy water.

With sleek modern design and classy color,
Alkamedi will provide you with harmonious interiors becoming
with kitchen surroundings, and with composure to your space and feelings.

"ALKAMEDI"
will change your fixed concept about water.

You can feel the difference as a cup of water.
"ALKAMEDI" always thinking for your families'
health and seeks cornucopia in your life.

ALKAMEDI
INDIA

Henceforth, you can choose the water which suits your body. What is water ionizer?

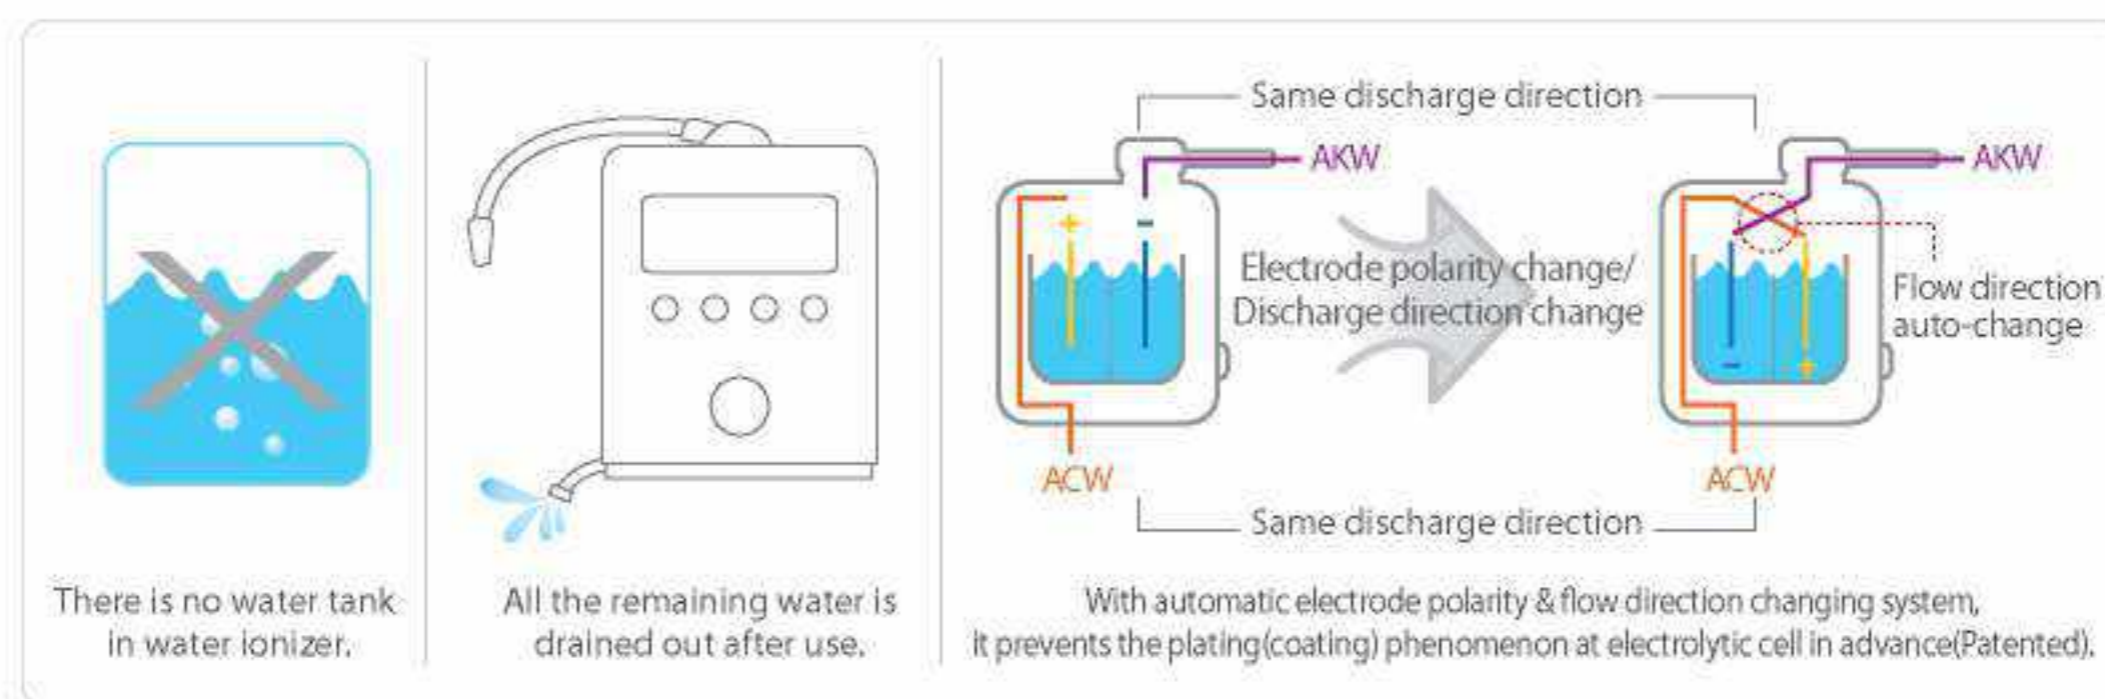

The water ionizer is a very machine that produces purified water thru filtration, and produces alkaline water and acidic water by electrolysis.

You can selectively drink and use seven different water in different pH according to desired use.

The water ionizer is safe and free from water tank. More clear water by auto-cleaning system!

After purified water passes thru the filter, alkaline water and acidic water is discharged after going thru ion-separation at the electrolytic cell, hence there is no need water tank. In addition, the remaining water inside the unit is automatically discharged after usage and the polarity of electrolytic cell is also changed automatically to ensure cleaning alkaline water is dispensed at the next usage.

Alkaline water is quite different from other kinds of water in every sense.

1. Stays fresh for a longer time!

If vegetables or fruits are soaked in alkaline water, you can stored more freshly and longer.

※ORP(Oxidation Reduction Potential) level may differ according to tap water, temperature, inflow rate, pH values, etc.

※If tap water passed through the water ionizer, its physical properties will be changed to alkaline water having a reduction potential. If vegetables or fruits are soaked in alkaline water, they will be stored more freshly and longer because they has a physical property of restricting oxidation.

Digital Water Ionizer
ALKAMEDI

"ALKAMEDI"

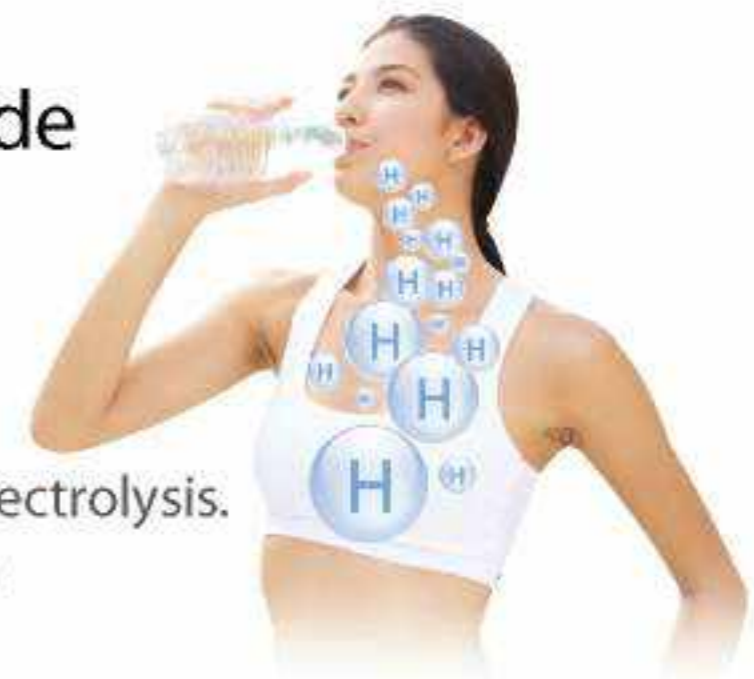

always thinking for your families' health and seeks cornucopia in your life.

What do you think of overproduced superoxide by complexed lifestyles and stress in modern society?

2. Alkaline water contains active hydrogen.

Alkaline water contains lots of active hydrogen produced by electrolysis. If you dispense or fill up a glass of alkaline water, you will find a myriad of hydrogen water bubbles therein.

The alkaline water includes ionized minerals which is essential & suitable for our body.

3. Gather & gather minerals!

The minerals contained in tap water migrated into alkaline water by 20 ~ 30% through electrolysis.

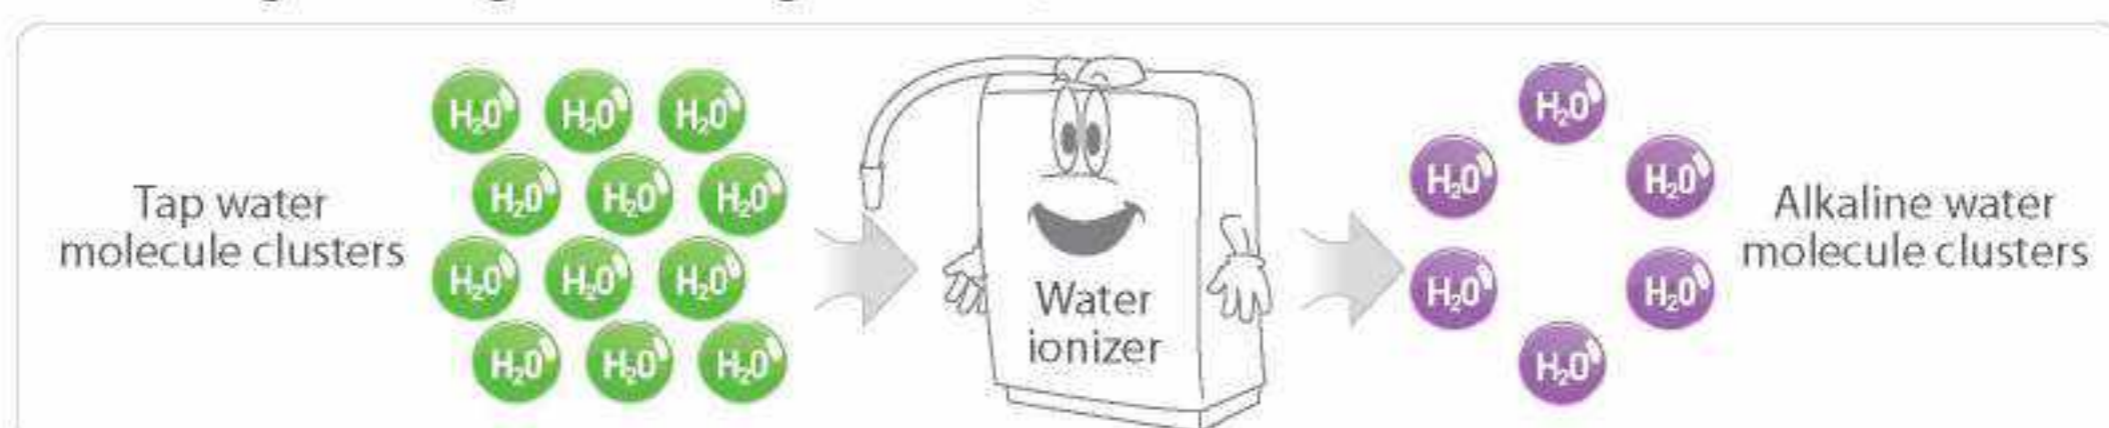

※ The increased minerals may differ according to minerals contained in tap water and electrolysis level.
※ The presently given values were provided by using a TDS (Total Dissolved Solids) tester by our company.

With very small size clusters, alkaline water can be consumed easily. And, it provides a depth to the tastes of cooked foods.

4. Alkaline water is easily and softly swallowed over your throat!

Clusters of water molecules in alkaline water is miniaturized by electrolysis. Whereby you can feel the easiness and softness in drinking alkaline water, and they are easily absorbed by the body and can rapidly discharged as well. Therefore, we recommend that you use alkaline water in cooking, coffee & tea brewing, ice-making and long time storage of foods, etc.

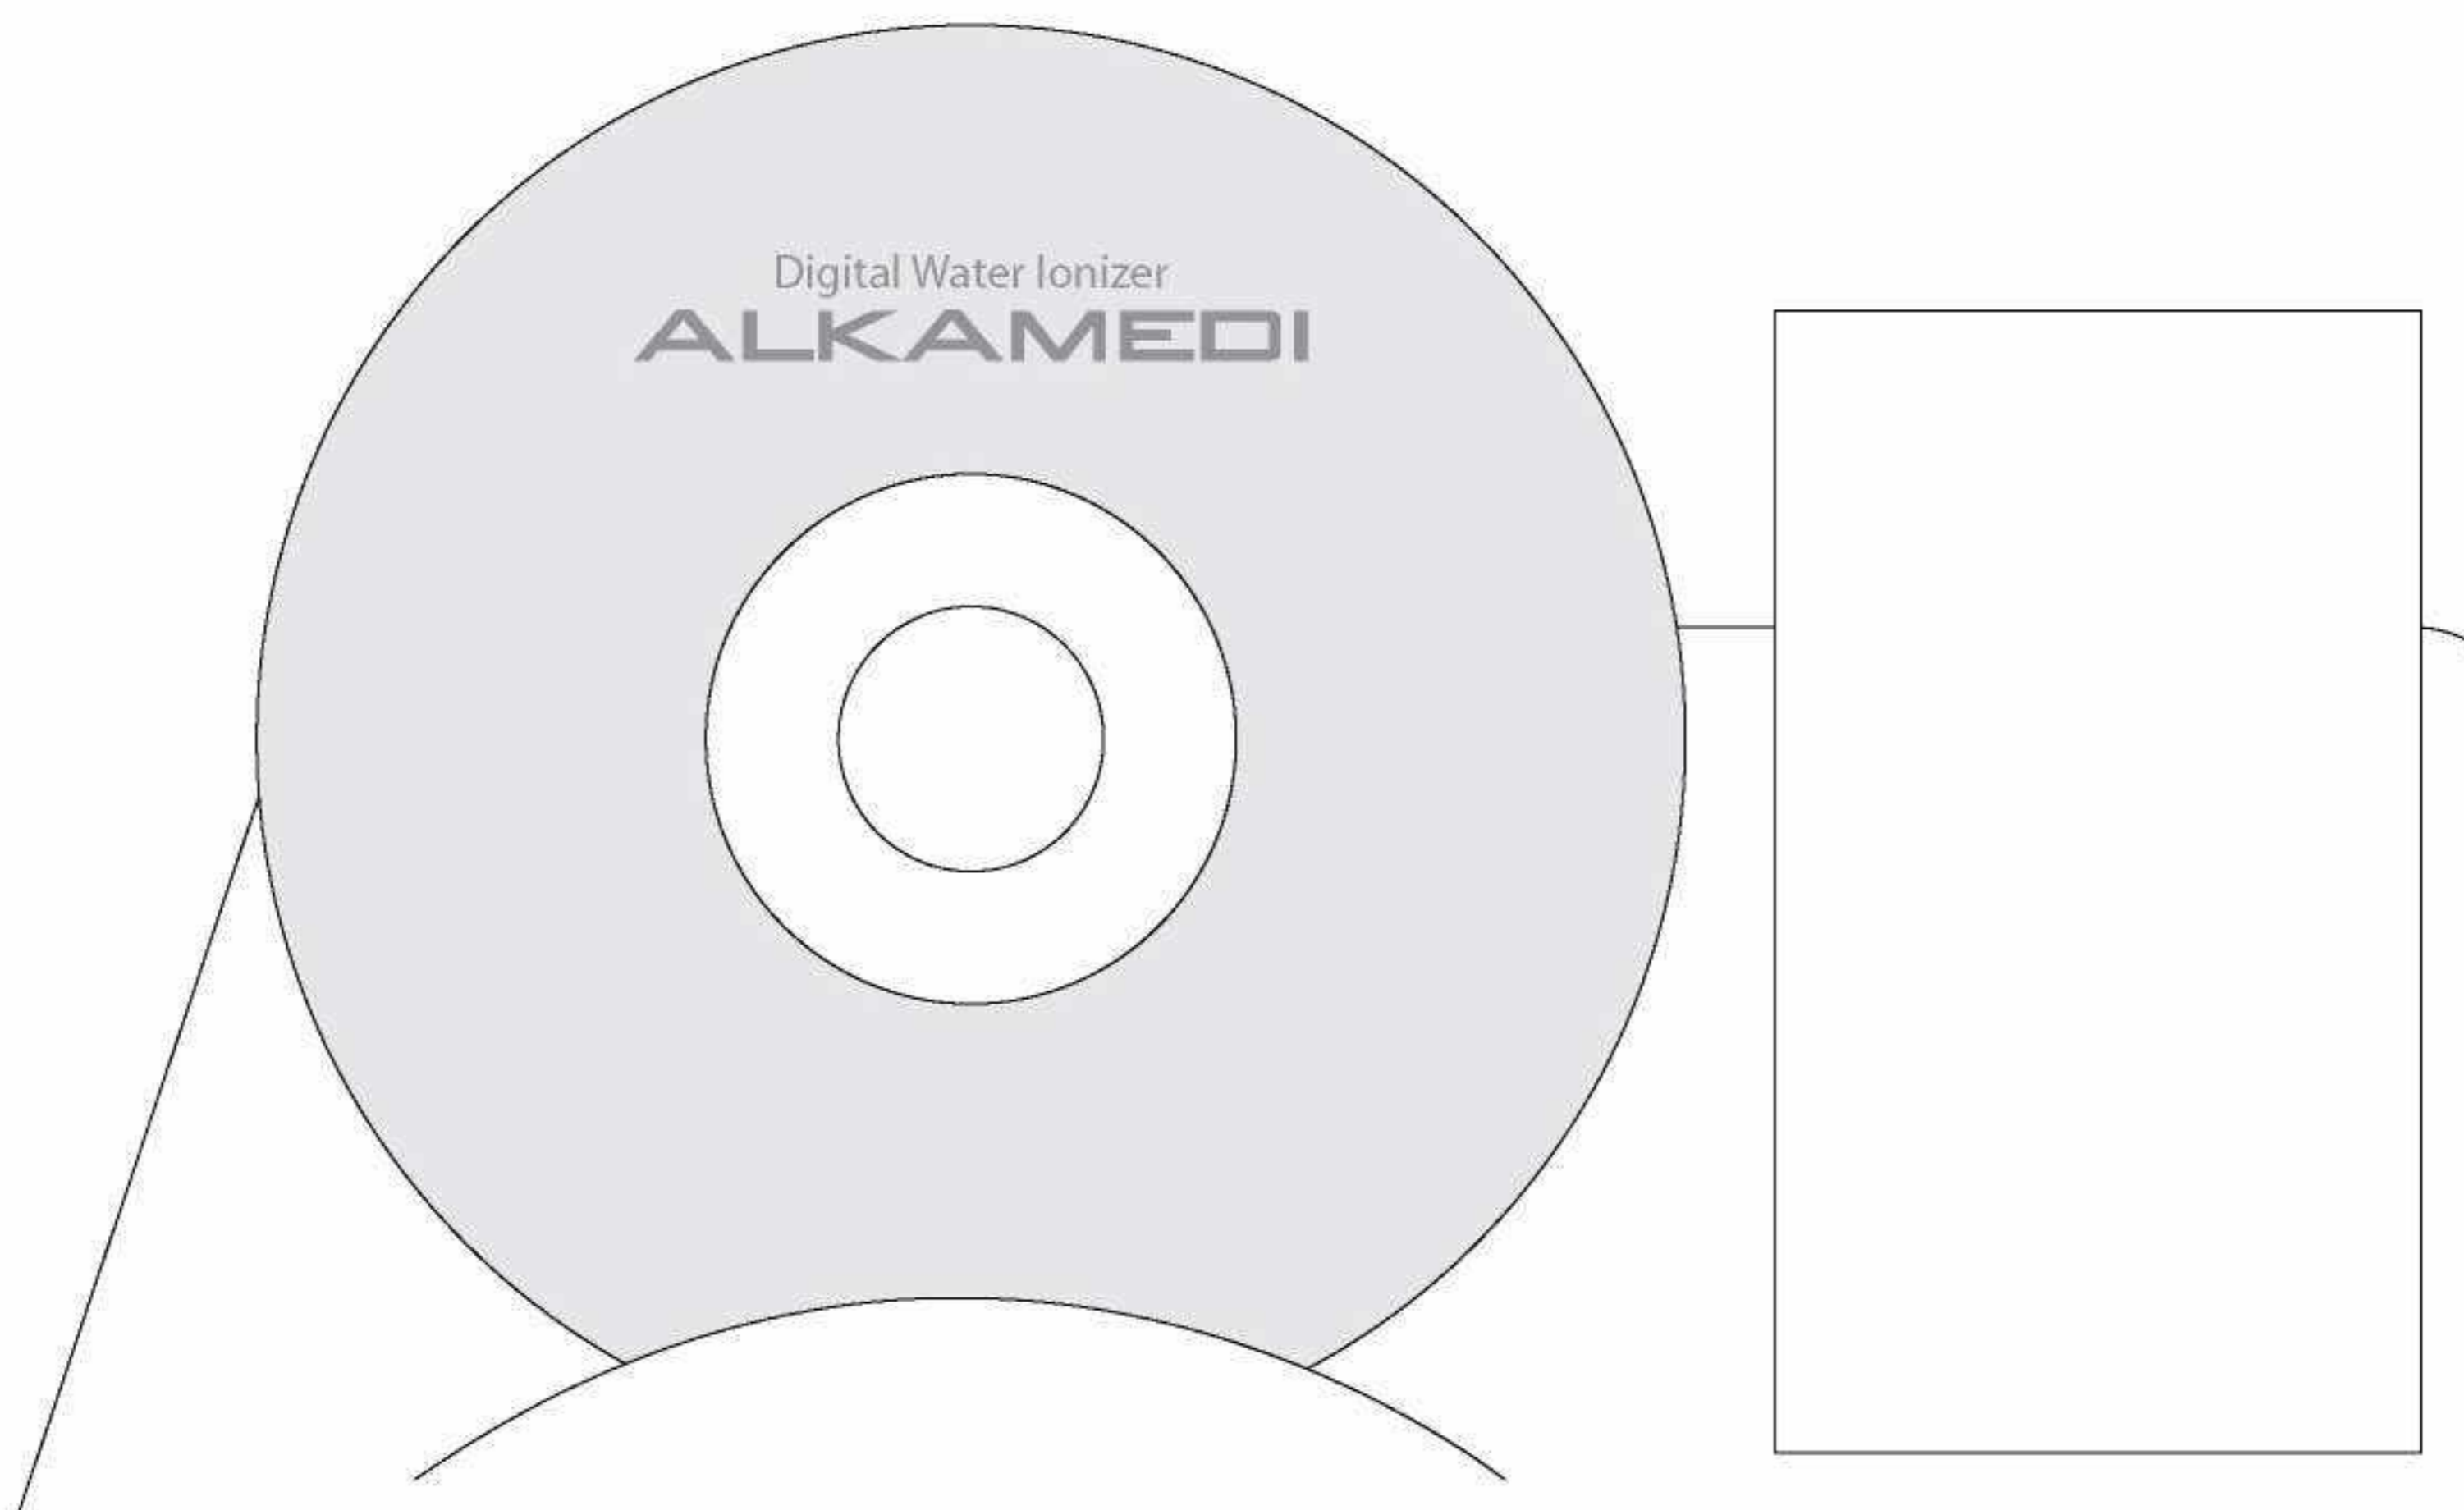

※ Clusters of water molecules may differ according to tap water and electrolysis level.

Are you healthy?

Please take care of your health in this busy modern society!

Are you always worried about the health of your kids, spouses and parents?

The water ionizer producing alkaline water of pH 9.5 value is officially registered as medical device conducive to treating "Chronic diarrhea", "Indigestion", "Hyperacidity" and "Abnormal fermentation in stomach" (Never fail to read cautions regarding daily allowable quantity and use).

ALKAMEDI

Google™

Please search for various thesis & benefits about "alkaline water".

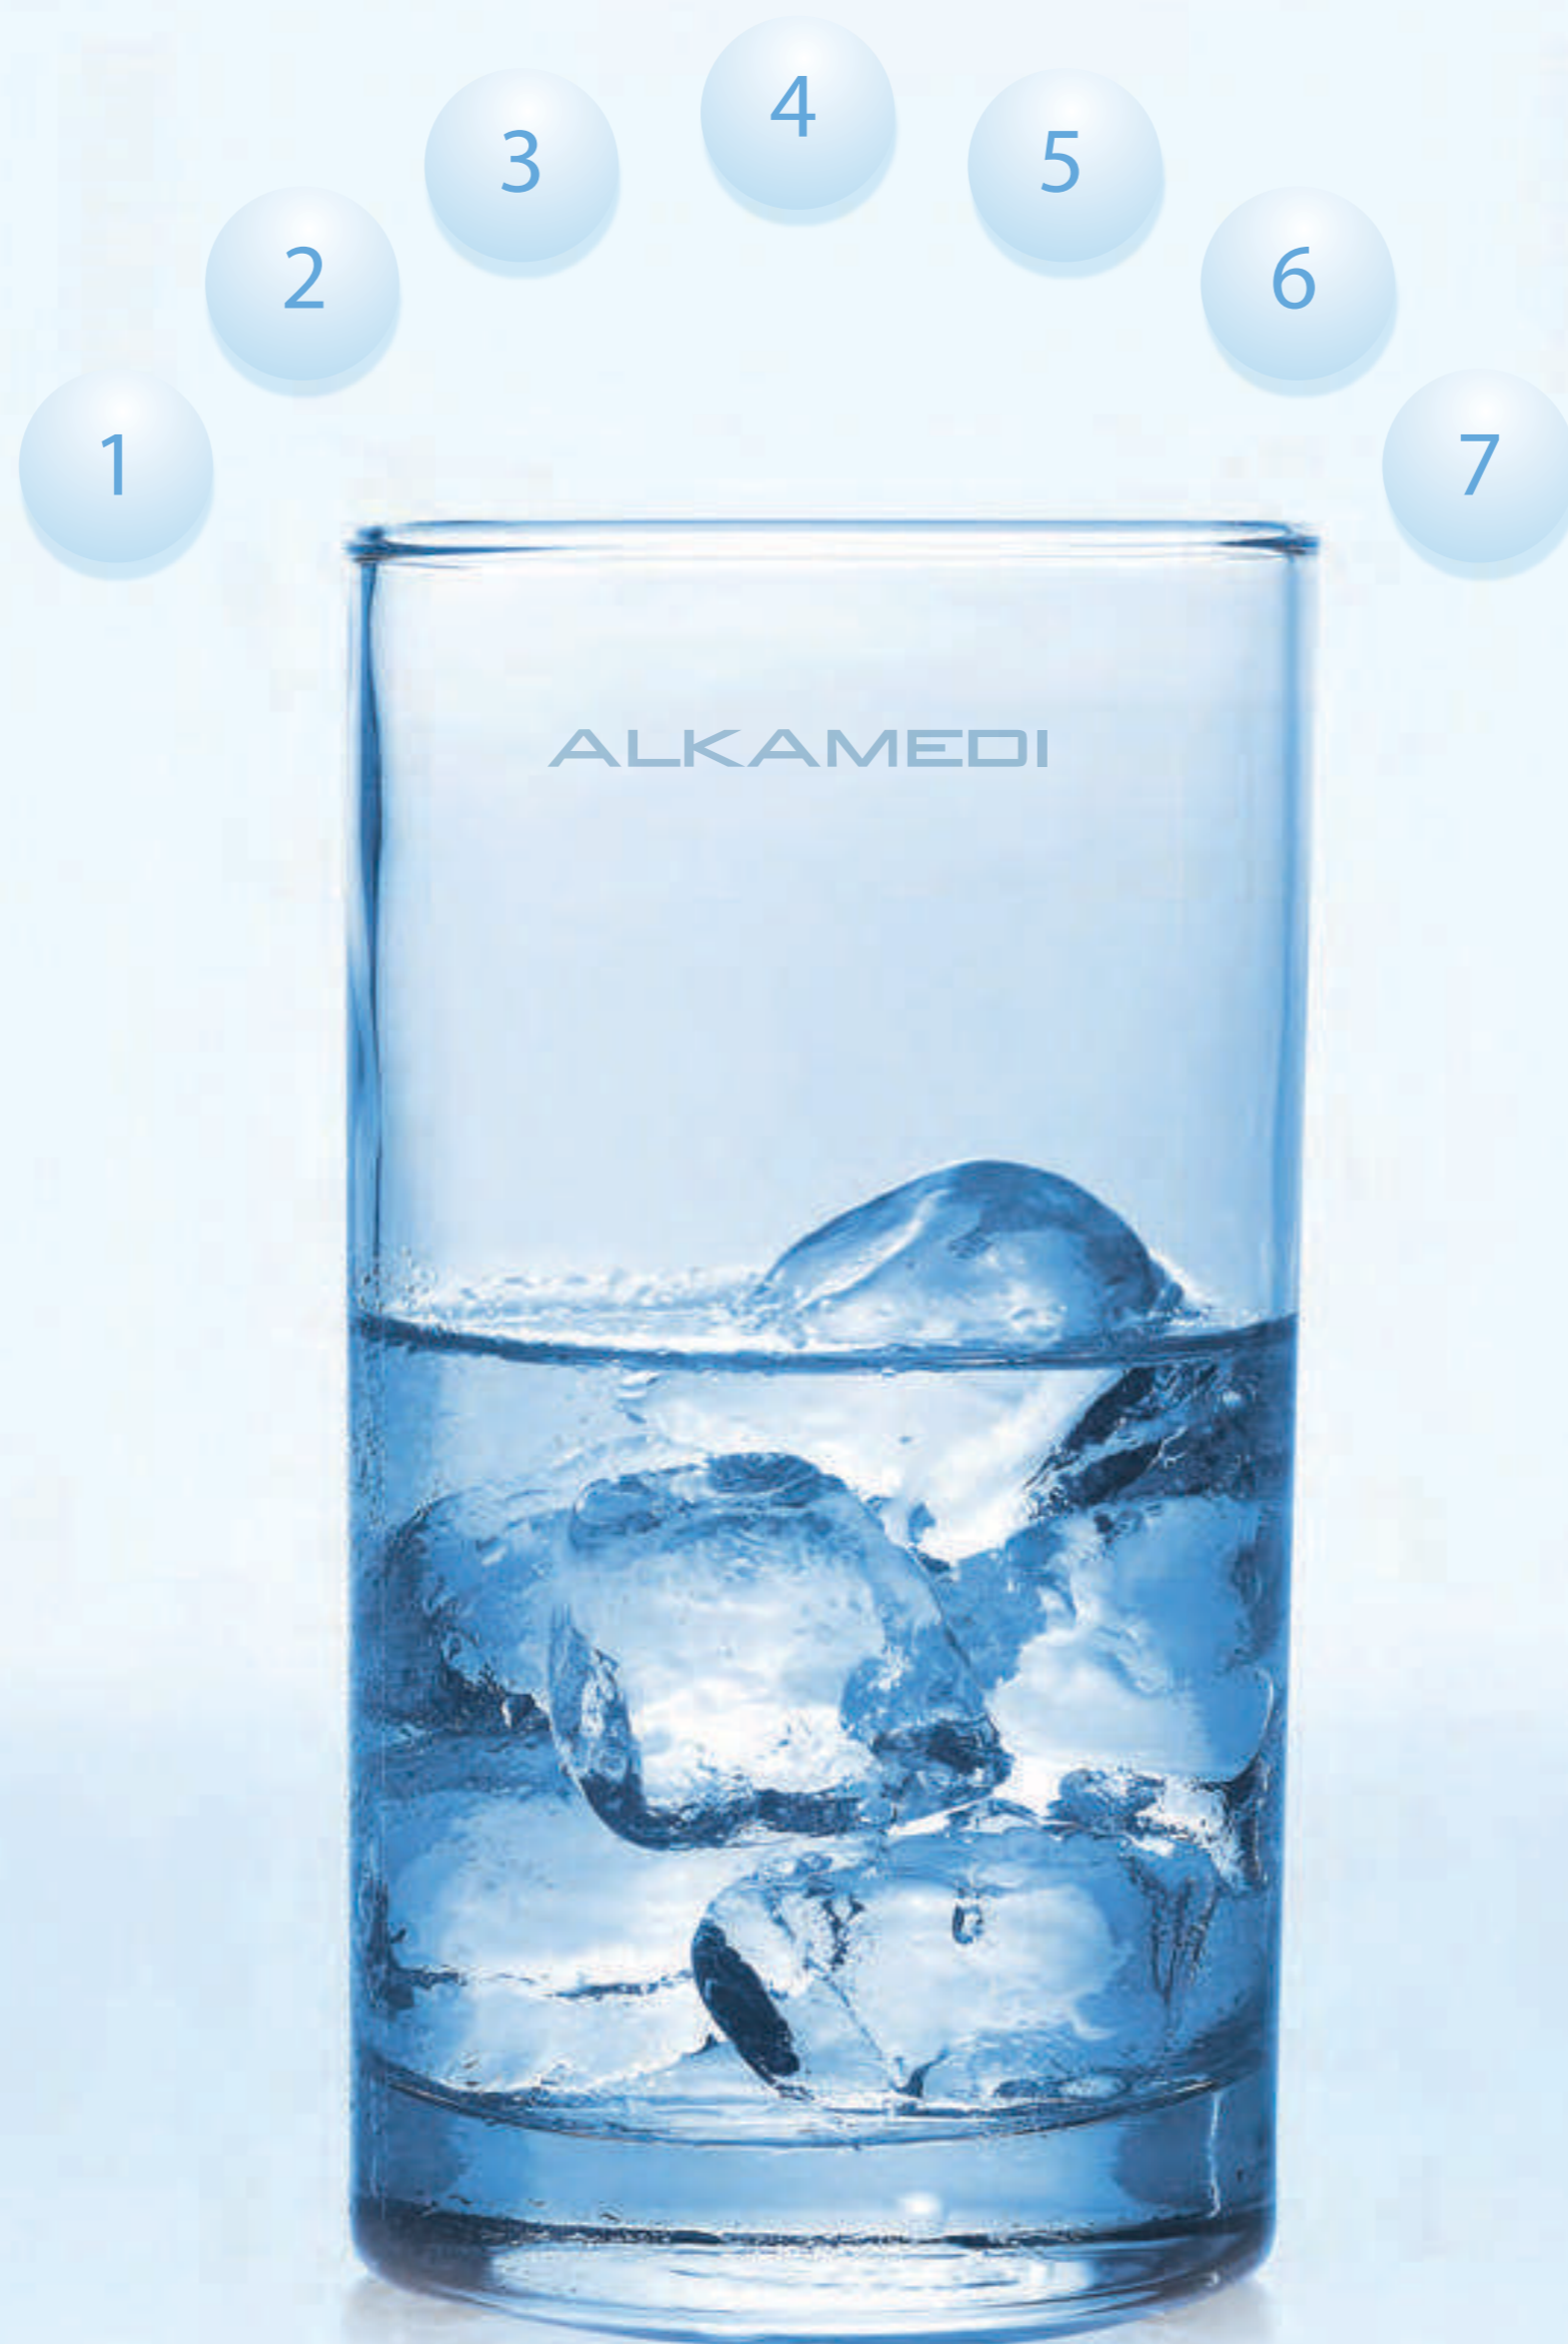

- Electrolyzed-Reduced Water Scavenges Active Oxygen Species and Protects DNA from Oxidative Damage.
- The Effects of Electrolyzed Reduced Water on Blood and Organ Tissues of Mice.
- The mechanism of the enhanced antioxidant effects against superoxide anion radicals of reduced water produced by electrolysis.

Please be selective of your water, even one glass can make a difference.

Alkaline water 5 levels, Acidic water 3 levels, Purified water 1 level.
You can choose seven types of water by adjusting pH values.

The water ionizer produces purified water through filtration
and produces alkaline water and acidic water by electrolysis.

You can selectively drink and use seven different water in
different pH according to desired use.

AMS2100S

AMS2100, AMS2100S (5plates)

- Product / Model No. : Alkaline Water Producing Equipment AMS 2100 / AMS 2100(S) ○ MRP (with GST 18%) : 1,80,000/- ○ Warranty : 1 Year On Full Machine & 5 Years On Chamber
- Dimension / Weight : 346 (W) x 240 (H) x 169 (D) (mm) / about 5.1Kg ○ Input Voltage : AC230V ○ Applicable Water Pressure/Temp. : 0.7~5kgf/cm² / 5 ~ 30°C Operation Type / Means
- : Operation Knob (Water Supply On/Off) & Touch Buttons Electrolysis Method : Continuous Electrolysis (pH Range : Alkaline : pH 7.5~ 9.5, Acidic : pH 3.5~5.0) Electrolysis Levels :
- Total 7 Levels (Alkaline 4 + Purified+ Acidic 2) with 7 Color Display Cleaning Device : Automatic Cleaning System (No waiting interval / Patented) Electrode Plates : 5 Platinum
- Coated Titanium Plates (0.1μ Platinum Coating) Plate Size : 74 (W) x 137 (H)mm Water Production : 2 to 2.5 Ltr. Per Minute
- Filter Replacement : Easily replaceable cartridge with Authentic Filter Recognizer ○ Filter Life Span : About 3,600 l based on Chloroform (within 1 year)
- Filter Life Span Indicator : Icon on LCD Display Screen ○ Deep Cleaning (with Citric Acid) : Not Required ○ Water Supply : Direct connection to a faucet or water supply line
- Selective Voice Guide : 9 Languages (Korean, English, Spanish, French, Italian, Russian, German, Chinese, Polish)

※ The colors of catalogue may differ with actual colors of product.
 ※ Please ensure correct usage of this product and that you have read the instructions thoroughly.
 ※ Due to quality improvement, specifications of the unit may be changed without prior notice.

Wait a moment! You need alkaline water!

Alkaline water of pH 9.5 value is conducive to treating
"Chronic diarrhea", "Indigestion", "Hyperacidity" and "Abnormal fermentation in stomach".

The water ionizer producing alkaline water of pH 9.5 value is officially registered
as household medical device conducive to improving stomach symptoms.

AML3000S

AML3000, AML3000S (5plates)

- Product / Model No. : Alkaline Water Producing Equipment AML 3000 / AML 3000(S) ○ MRP (Inclusive GST) : 1,90,000/- ○ Warranty : 1 Year On Full Machine & 5 Years On
- Chamber Dimension / Weight : 346 (W) x 246 (H) x 140 (D) (mm) / about 5.4Kg Input Voltage : AC230V Applicable Water Pressure/Temp. : 0.7~5kgf/cm² / 5 ~ 30°C Operation Type
- / Means : Operation Knob (Water Supply On/Off) & Touch Buttons Electrolysis Method : Continuous Electrolysis (pH Range : Alkaline : pH 7.5~ 9.5, Acidic : pH 3.5~5.0) Electrolysis
- Levels : Total 7 Levels (Alkaline 4 + Purified+ Acidic 2) with 7 Color Display Cleaning Device : Automatic Cleaning System (No waiting interval / Patented) Electrode Plates : 5
- Platinum Coated Titanium Plates (0.1μ Platinum Coating) Plate Size : 74 (W) x 137 (H) mm Water Production : 2 to 2.5 Ltr. Per Minute
- Filter Replacement : Easily replaceable cartridge with Authentic Filter Recognizer ○ Filter Life Span : About 3,600 l based on Chloroform (within 1 year)
- Filter Life Span Indicator : Icon on LCD Display Screen ○ Deep Cleaning (with Citric Acid) : Not Required ○ Water Supply : Direct connection to a faucet or water supply line
- Selective Voice Guide : 9 Languages (Korean, English, Spanish, French, Italian, Russian, German, Chinese, Polish)

What kinds of water are you using for coffee, tea and green tea?

Because alkaline water has excellent reduction potential and small size water molecule clusters produced by electrolysis, it increase taste and has a better fragrance. And, alkaline water makes milder and softer coffee, tea & green tea.

Mommy! Water please!

Safe and free from water tank!
Alkaline water contains lots of minerals.

Because water ionizer is directly connected to the faucet, no water is stored in a water tank after purification.
Furthermore, minerals of positive (+) property contained in water moves to a negative (-) electrode plates by electrolysis to increase mineral contents by 20 ~ 30%.

Easily and softly swallowed alkaline water! Rich concentration of active hydrogen in alkaline water!

Because alkaline water molecule clusters is smaller than tap water due to the process of electrolysis, you can feel the easiness and softness in drinking alkaline water. In addition, active hydrogen is generated through chemical and physical reactions in process of electrolysis.
